

# LONG-LASTING SOLUTIONS FOR PREMIUM CONSUMER GOODS

**Creative.  
Competitive.  
Custom-Made.**

## A FEW APPLICATIONS

We produce components for high-quality home coffee machines, semi-automatic and professional machines, as well as for various electrical household appliances

**THRUST BEARINGS:** Solutions for grinding mills, as well as actuator and gearbox components

**STAMPED PARTS:** Electrical contacts and connections

**PLASTIC PARTS:** Actuator and gear components such as housings and geared parts, as well as applications made of metal and plastic compounds (hybrids)

## WHAT WE OFFER YOU

Thrust bearings, stamped and plastic parts as well as assemblies - Highest quality at competitive prices

- +** Inhouse Engineering Service & Toolmaking for more flexibility and timely development
- +** We support you from the very start. Whether you need components, assemblies or prototypes
- +** Together to series production. With you, we develop custom solutions for your demanding requirements
- +** All this with the help of our modern machines and innovative process technologies
- +** ISO 9001 - 14001, and IATF 16949 certified

## VERSATILE THRUST BEARINGS

Thrust bearings are a reliable and cost-effective solution to guarantee the precise function and a long service life of the equipment. The wide range of design possibilities in material and technical capability give us a lot of flexibility to find your custom solution.

The design and material selection of our thrust bearings depend entirely on your requirements, your application, and its specifications. And we always pay great attention to excellent quality.

## COMPLEX STAMPED PARTS

With our high-performance stamping, forming and deep-drawing technology, we can create simple or complex application solutions. Thanks to our wide range of materials and surface finishes, you benefit from a large variety of high-precision parts for every industry.

Our own toolmaking and engineering bring the necessary in-house knowledge to produce large quantities in a timely and cost-effective manner.

## POWERFUL PLASTIC PARTS

Thanks to their properties, plastics allow us to develop a wide range of technical solutions for everyday life. High-performance and engineering plastics in particular offer interesting fields of application. And the combination of metal and plastic creates especially high-performing components. In combination with our stamping technology, you benefit from a wide variety of options.
